

BLUME'S[®]

Care & Maintenance

FIRSTLINE™ Clean & Restore:

Artisan Group's Firstline™ Clean & Restore is the perfect daily cleaner for granite countertops and surrounding surfaces. It is a pH neutral cleaner with evaporative cleaning action and surfactants that leave no residue streaks or water spots on your countertop. Firstline™ Clean & Restore's concentrated formula replenishes granite properties with every use to ensure the longevity of your granite countertop.

FIRSTLINE™ Shine:

Artisan Group's Firstline™ Shine spray helps maintain your countertops and will keep them looking like new. It enhances the natural color of granite, while simultaneously protecting the natural stone.

A slight silicone additive in Firstline™ Shine helps build protective layers on the granite without waxy buildup. This is a great spray for daily, weekly or monthly use. It is easy to use, fast drying, and unlike other sprays, leaves no water spots or streaks.

BLUME'S®

Care & Maintenance

All of Blume's KeyStone™ Granite countertops are sealed with the highest quality sealer on the market. FIRSTLINE™ not only protects your countertop, but helps maintain its natural beauty and seals out harmful bacteria.

- 100% V.O.C Compliant
- 100% Biodegradable
- Solvent-based Impregnator Sealer
- No Harsh Solvent Smell
- Non-Flammable
- Repels Water and Oil in Minutes
- Chemical properties with the formula change the surface tension of your stone
- Quick-Dry Formula
- Designed to Penetrate Dense Stone
- Manufactured 100% in the United States

FIRSTLINE™ is an exclusive solvent-based and V.O.C. compliant impregnator sealer. It is the finest sealer for granite penetrating grout and dense stone to protect against water and oil staining, while allowing substrate to properly breathe. It has a non-yellowing, long-lasting formula that will not change the surface appearance of your granite. FIRSTLINE™ is specifically designed to bond with quartz and silica materials inherent to granite and grout.

The solvent-based sealer is thinner than traditional water-based sealers allowing it to carry the sealant deeper into dense granite at a much faster rate. The solvents used in FIRSTLINE™ sealer are approved by the government and are proven to be ground-level ozone safe.

Care & Maintenance

Silicone Hot Pad

SPECIFICATIONS:

- 11 ½" Square Hot Pad in Black
- Resists heat up to 675°
- Dishwasher Safe
- Super Flexible
- Non-Stick, yet resists skidding and sliding
- Made from medical-grade FDA-approved silicone

All of the materials fabricated by Blume's are heat resistant, but not heat proof. To protect your countertop, the use of a hot pad or trivet must be used underneath pots, pans, crock pots, skillets and all other heat generating appliances.

Please refer to the care and maintenance of the material of your choice for more information.
